

## This Book is Full of Spiders: Seriously, Dude, Dont Touch It

Warning: You may have a huge, invisible spider living in your skull. This is not a metaphor. You will dismiss this as ridiculous fearmongering. Dismissing things as ridiculous fearmongering is, in fact, the first symptom of parasitic spider infection - the creature secretes a chemical into the brain to stimulate skepticism, in order to prevent you from seeking a cure. Thats just as well, since the cure involves learning what a chain saw tastes like. You cant feel the spider, because it controls your nerve endings. You cant see it, because it decides what you see. You wont even feel it when it breeds. And it will breed. So what happens when your family, friends, and neighbors get mind-controlling skull spiders? Were all about to find out. Just stay calm, and remember that telling you about the spider situation is not the same as having caused it. Im just the messenger. Even if I did sort of cause it. Either way, I wont hold it against you if youre upset. I know thats just the spider talking.
